- Arabic

About Me

A bright scientific student who wants to study at a prominent university to learn more about the real-world uses of computer science and artificial intelligence. I have a broad skill set and great analytical abilities in computer science.

My goal is to master computer science so that I may build a firm basis for my undergraduate studies and contribute to the development of new technology.

Certifications and Extra Curriculars

Practicing Black Belt in Karate
2019–Present

I've maintained and remained a black belt in the martial art of karate throughout high school
